

Advanced search (dorks) documentation

By default, spaces mean and / or

```
hello world
```

Either "hello" and "world", or "hello", or "world".

AND

```
hello AND world
```

"hello" and "world".

OR

```
hello OR world
```

Either "hello" or "world".

NOT or "-"

```
NOT hello world
```

No "hello" but "world".

```
-hello world
```

No "hello" but "world".

"*"

```
hel*
```

"hel" then everything that comes behind.

"?"

```
?ello
```

Replace with any letter "Aello" or "Bello" or "Cello".

The quotation marks ""

```
"hello world"
```

Exact phrase.

Proximity searches

```
"hello world"~10
```

From 0 to 10 terms between "hello" and "world".

url

```
url:*test*
```

Contains "test" in the url.

Range []

```
title:[10 TO 100]
```

The title contains a range number between 0 and 100 inclusive.

Range {}

```
title:{10 TO 100}
```
